

# CUTPLAN *Sample Spread Plan* Request Form

Take advantage of AMS Inc.'s *Sample Spread Plan* offer by completing the following pages for as many cut orders as you wish. Fax them to (01) 561-892-0972. Alternatively, you may fax your existing worksheets containing the same information or e-mail data files.

We will respond with your sample spread plan promptly so you can quickly and easily evaluate **CUTPLAN's** potential for fabric-savings within your organization. Rarely does a software system provide such a measurable and concrete indication of benefits before installation.

**CUTPLAN** places no limitations upon the number of sizes or colors in a cut order.

## B. MARKER OR SPREAD PLANNING DETAILS

Because of enormous variation in marker usage (even among producers of identical garments) we will need some additional information about your existing methods. Providing us with data on your existing markers or spread planning practices (if marker data is not readily available) will allow us to create fabric-saving spread plans with **CUTPLAN** that will conform to your manufacturing processes.

Please provide either:

**MARKER DETAILS** - A list of all the markers for the style listed in Section A. For each marker include efficiency, length, width, and sizes. You may send this list via fax, mail, or e-mail.

If you use marker software, you may find it easier to create and e-mail a report file. For example, Microdynamics has the mreport feature that will create ".rpt" files by style. Accumark software has a report function in Marker Explorer—once you select the markers of the style that you want, select "Report" to create the report on-screen. Then select "File->Save as->Text File". Contact us for more details on producing marker reports from virtually any marker system.

or:

**SPREAD PLANNING INFORMATION** - Fill out the form on the next page for just one of the cut orders in Section A (or provide your existing worksheets with the same information).

Also, please provide your maximum acceptable cutting height here: \_\_\_\_\_units.

**AMS Inc. will not disclose any of the information provided on these pages to any third party.**
